Press release

Renens, 22.07.2022

Salt's mobile network number 1 in Switzerland in June 2022

In June, Salt's mobile network was again ranked number one among its national competitors and first out of 82 tested operators on a global scale with a total of 186 477 points by 5GMark, a renowned international mobile performance test platform.

The average download speed measured was 258.9MB/s and the average upload speed was 39.5MB/s. These levels allow customers to benefit from an excellent download experience and to stream high-definition videos as well as perform video calls from anywhere, at any time on their mobile device.

This achievement is the result of the company's continuous investments in its mobile network across Switzerland. In 2022, Salt continues to modernize its existing 3G and 4G infrastructure and to extend its 5G network.

Pascal Grieder, CEO at Salt, commented: "*We are very proud of the world-class network and excellent value for money we are delivering to our customers. We will continue to invest in our infrastructure to further improve the quality of service for our customers.*"
